Love Desire Men's Perfume with Pheromones 100ml

Love Desire with a capacity of 15 ml stands out from other variants **increased by 63%** the amount of pheromones in each milliliter! This is it **the strongest and handy at the same time** pheromone version. Please refer to the table in the auction description to check the exact concentration of pheromones. Pheromones and perfumes with their addition work naturally, invisibly. The scent of Love & Desire itself is very masculine, decisive and hypnotizing, while pheromones have no scent and are not noticeable to you or to third parties. When using perfumes with pheromones, you no longer have to use other scents.

Each of us lacks courage sometimes **male-female relationships**. Sometimes we feel too much **not very attractive,** which in turn blocks us and makes us reluctant to start a conversation with the person we are interested in. Attractiveness is influenced not only by our appearance, but also by **"that thing"** , ours **internal magnetism.**

How do Love & Desire pheromones work?

Perfumes containing pheromones have a natural, imperceptible effect.

Love & Desire is for you if:

The Love & Desire scent itself is very masculine, decisive and hypnotizing, while the pheromones have no scent and are not noticeable to you or to third parties. When using perfumes with pheromones, you no longer need to use other scents

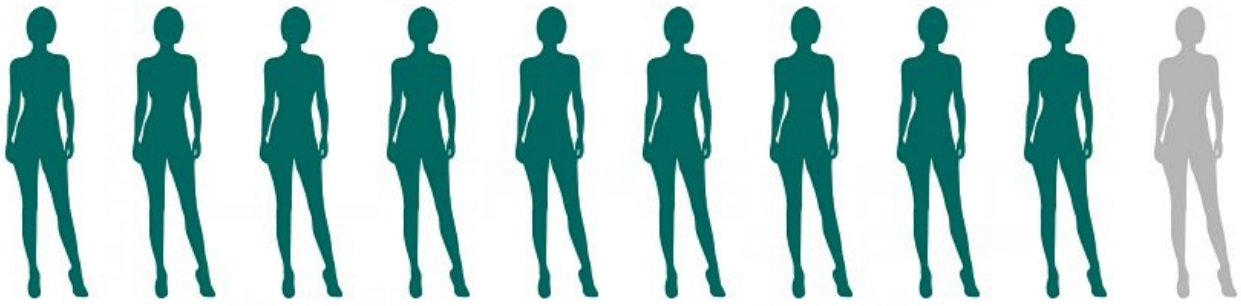

• you want to flirt
• you are looking for your other half permanently
• you are looking for new friends
• you want to have **better contact with people**that you already know, e.g. at work, etc.

Do you want to change your life? Use pheromones every day! If you would like to freely make new friends and still remain yourself, rely on natural, proven methods - pheromones. Pheromones are a natural channel of communication between people, so they affect everyone.

Most likely **vulnerable** pheromones are there **women between 18 and 40 years of age**. In this interval **9 out of 10 women** during our anonymous research, admitted that they were influenced by pheromones! The study was conducted on a group **over 5 thousand women.**

Pheromones with Love & Desire pheromones will help you:

- boost your self-confidence in any situation
- get more attention

• gain the respect and sympathy of those around you
• feel more masculine in your skin

Under the influence of pheromones, it is not you who changes, but the people you are with. Pheromones send them an invisible signal, emphasizing your strength and magnetism. Thanks to the pheromones contained in the Love & Desire fragrance, it is easy **you will ask the woman you are interested in for her phone number, invite her on a date or to dance at a party.**

And you can be sure that **no one will refuse you**!

What does Love & Desire for men smell like?

It is an energizing fresh fragrance, filled with life and freedom.

It consists of the following fragrance notes:

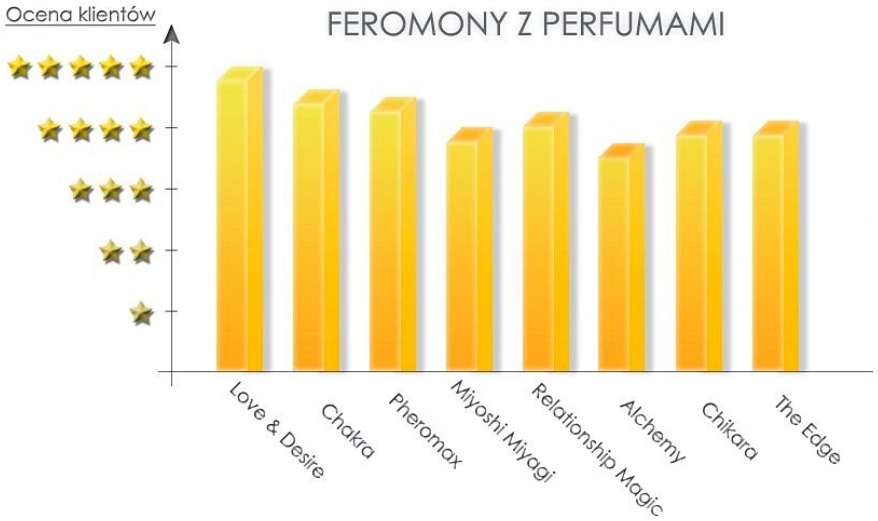

People who wear this fragrance feel unique and uninhibited. Women describe this scent as: intriguing, attractive, masculine.

• grapefruit
• birch leaf
• cypress
• sage
• vetiver
• patchouli

Why are Love & Desire the best pheromones for men?

Love & Desire is **the most effective pheromones**. This is confirmed by the opinions of our customers. In addition, these pheromones were recognized as the best product in the "most attractive scent" category.

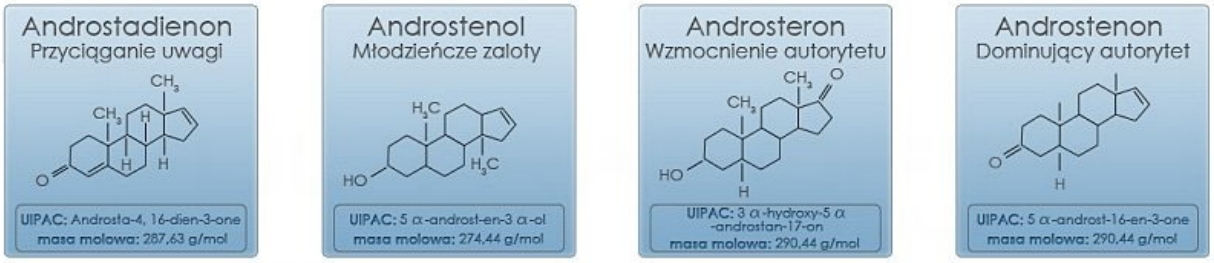

The effectiveness of Love & Desire is based on **years of work and experience** over the composition of the pheromone mixture. This amazing recipe affects the subconscious, mind and mood, creating an atmosphere conducive to establishing close relationships. Anyone who tries this fragrance once will immediately feel that they become the master of the situation and the object of desire. Pheromones work immediately after application. You will be amazed at the results. So let yourself be surprised and change your life.

Love & Desire – an original, extremely effective mixture of 4 pheromones

Most commercially available pheromones are based on chemical compounds: **androstenol** i **androstenone**. Love & Desire pheromones are the only ones that contain two more important ingredients: **androsterone** i **androstadienone**. This formula was created specifically to provide you with maximum results. You won't find such a formula on the market. Only our Love & Desire pheromones have a four-component, unique combination of ingredients.

• Androstenol – **will help you flirt** It is produced by men during puberty and has a very strong effect. Its level is usually higher in dominant men. It influences the attractiveness of both women and men, and has a social significance when establishing contacts. Women aged 20 to 50 are particularly sensitive to its smell.
• Androstenone – **will arouse respect for you** It is a scent produced mainly by dominant men and signals power among members of the same sex. It is used by men to attract women's attention and arouse their interest. Men who are in highly competitive conditions, e.g. athletes, brokers and even prisoners, have a much higher level of this pheromone. It is worth using it, for example, at work, when you want to gain more respect.
• Androsterone – **will build your authority** It is the most masculine of all ingredients. It causes a feeling of domination, but does not affect the effect of aggression, creating an aura of safety. It naturally manifests itself in alpha males.
• Androstadienone – will make it **you will attract women's attention** "Love pheromone" that changes the mood of women. Many studies on this pheromone indicate that it has a strong influence on brain activity in women. It may be accompanied by effects such as increased attention, favor, and improved mood. Interestingly, this scent can also alleviate the effects of premenstrual syndrome in women, improving their attitude and having a relaxing effect.
